DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 30 – 46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 30, line 8, it is not clear as to whether or not Applicants' actually mean "second sending means"; i.e., it appears to be the first sending means sending a second request.

In claim 38, line 8, there appears to be a word or phrase missing from the claimed limitation; i.e., "sending the session identification and to the client". Also, there is no proper antecedent basis for "the client".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 – 5, 7 – 14, 16 – 26, 28 – 34, 36 – 43, 45 – 55 and 57 - 62 are rejected under 35 U.S.C. 102(b) as being anticipated by Dustan et al.

Regarding claims 1, 3 – 5 and 7, 9, 11, 13, 14, 16, 18, 20, 25, 26, 28, 30, 32, 33, 36, 38, 42, 45, 47, 49, 51, 54, 57 and 59 - 62:

Dustan et al, figures 5 and 6, teach a system and method for securely accessing information from data sources through a network such that Applicants' step of sending a first request reads on the menu selection at step 218, Applicants' credential reads on the account number and password at step 176, Applicants' session identification reads on step 216, Applicants' second request reads on step 234.

Regarding claims 2, 10, 19, 23, 31, 39, 48 and 52:

Applicants' user name and password reads on the account number and password of Dustan et al.

Regarding claims 8, 17, 21, 29, 37, 46, 50 and 58:

Dustan et al teach that each menu selection utilize scripts which are assigned a URL, column 15, lines 9 – 11.

Regarding claims 12, 24, 41 and 53:

Dustan et al teach that the session id is generated based on the date and time, considered to be random.

Regarding claim 22:

Dustan et al teach that the session id is also verified, column 9, lines 27 – 30.

Regarding claims 34, 43 and 55:

Dustan et al disclose storing the cookie, column 10, lines 37 – 43.

Regarding claim 40:

Dunstan et al teach associating the session id to the user account, column 9, lines 8 – 11.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6, 15, 27, 35, 44 and 56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dustan et al in view of Beyeh et al.

Although Dustan et al do not specifically disclose that the session identification data structure is in a rewritten uniform resource locator, Beyeh et al do teach that the URL can be overwritten as another method of keeping track of the URL's visited by the client. Therefore, it is considered that it would have been obvious to one of ordinary skill in the art at the time of the invention, to overwrite the URL, as disclosed by Beyeh et al if, for instance, cookies were not used and/or as another method of keeping track of the URL's visited by the client.

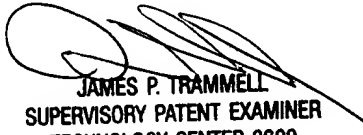

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dias et al, Guedalia et al, Barnett et al and Besaw et al each teach server access control.
